# APDR30-EU5

## Diesel generating set

### POWER YOUR **FUTURE**

### 30 kVA / 24 kW PRP 33 kVA / 26 kW ESP

### **Powered by Deutz**

Voltage	400/230V		V
Frequency	50Hz		
Number of phases	3		
Weight with liquids without fuel	1250 kg		
Dimensions (mm)	L	W	Н
Dimensions (mm)	2337	1042	1643

# 1. General technical data

Engine	DEUTZ TD2.2L3	
Alternator	STAMFORD S0L2-P	
Type of execution	G2	
Frequency	50Hz	
Voltage	400/230V	
Standard Control panel (Option A)	DSE 7320 MKII	
Standard Control panel (Option B)	ComAp InteliLite 4 AMF 25	
Fuel tank (I)	150	
Sound level-Lp(A) (dB(A)@7m)	63	
Sound level-Lp(A) (dB(A)@1m)	70	
Sound power-LW(A) (dB(A))	92	

(m.p. cos φ 0,8)	PRP (kVA / kW)	30 / 24
	ESP (kVA / kW)	33 / 26

<sup>1</sup>PRP: Continuous power ("Prime Power"). ESP: Emergency Standby Power according to ISO8528-1. Maximum active power tolerance (kW) ±5%

Voltage	PRP (KVA/KW)	ESP (KVA/KW)	Amperage (A)
400/230V	30 / 24	33 / 26	47,6

### **Directives and Regulations**

ENVIRONMENTAL CONDITIONS STANDARD ISO 8528-1:2018: 25°C, 100kPa and 30% relative

- Prime Power (PRP): Data on electrical power available at variable load without limit of hours per year. An overload of 10% is allowed for 1h out of 12. According to ISO 8528-1:2018.
- Emergency Standby Power (ESP): Data on electrical capacity available at variable load in case of emergency according to ISO 8528-1:2018.

The AKSA Generating Set has CE labelling which includes the following directives:

- 2006/42/EC. Machine Safety Directive.
- EN ISO 8528-13:2016. Part 13: Safety. Alternating current generator sets powered by reciprocating internal combustion engines.
- 2014/30/EU. Electromagnetic Compatibility Directive.
- 2000/14/EC. Noise Emissions Directive. Sound power levels evaluated in accordance with the procedure laid down in the directive.
- Directive 2011/65/EU on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS 2).

4 cylinders 4-stroke diesel engine online with Electronic regulation Electronic by means of a fuel pump, original from the manufacturer.

ENGINE EQUIPPED WITH PARTICULATE FILTER (DPF).

✓ Direct injection and suction system turbocharged. Original manufacturer's particle separator filter.

- Refrigeration through cooling liquid, fully distributed in the closed circuit run by an engine driven pump, tropicalised radiator, original from the engine manufacturer.
- Crankshaft-driven pump lubrication system. The filter is a full-flow insert cartridge, front housing, original from the engine manufacturer.
- Air intake system for turbo-fed combustion with two-stage filter, original from the engine manufacturer.
- Electric motor starting system, battery (maintenance-free) with switch, 12V Charging alternator and starter motor. Original elements from the engine manufacturer.

# 3. Alternator specifications

3.1. General technical data for the alternator

Make and mod	el	STAMFORD S0L2-P		
No. of poles		4		
Insulation class		Н		
No. of threads		12		
Mechanical protection index		IP23		
Voltage Regulator (AVR)		AS540		
Voltage regulation		±1%		
ESP power 27°C (kVA)		33		
Power PRP 40°C (kVA)		30		
No. of phases		3		
Power factor (cos φ) 0,8		8		
Performance η (%)				
50%	75%	100%	110%	
90,6%	89,5%	86,9%	86,1%	

- √ Brushless 4-pole alternator. Robust mechanical structure with easy access to connections and components. Insulation class H, coil pitch 2/3 and self-excited AVR.
- ✓ Protection with premium epoxy resins. High voltage parts are impregnated under vacuum, which always means very good insulation.

# Standard regulations that the alternator fulfils:

 AS 1359 | IEC 34-1 1 | BS EN 60034-1 | VDE 0530 | BS 5000 | CAN/CSA-C22.2-100 | NEMA MG1-32

Low wave distortion:

- THD (100% load) = 2%
- THF < 2%

Complies with: EN61000-6-3, EN61000-6-2 regarding radio interference.

# 4. Frame Specifications

- Unit mounted on electro-welded high-resistance steel frame, painted with epoxy-polyester powder paint. With retention bath.
- Connection of the assembly to the frame by means of antivibration dampers.
- Fuel tank located on the frame itself. The engine is equipped with a measuring gauge and fuel system.
- Tested in a saline mist chamber according to ASTM B-117-09, resistance 500h.

# 5. Soundproof canopy Specifications

- Electro-welded canopy made of high resistance galvanized steel painted with electrostatic epoxy-polyester powder paint.
- Interior soundproofing by means of a lining with soundproofing material.
- Tested in a saline mist chamber chamber according to ASTM B-117-09, resistance 720H. IP44 mechanical protection degree.

# 6. Standard Control panel (Option A)

Main elements of the control panel

- **6.1.A** Protection panel, distribution with automatic control module which allows you to work in manual, automatic or signal mode.
  - Emergency stop button.
  - · Protections:
    - 4-pole magnetothermic protection against overloads and short circuits.
    - · Protection fuses for the control set.

6.2.A Protection switch

Model

Schneider Acti 9 50A 4P

6.3.A Control module

Model

DSE 7320 MKII

DSE 7320 MKII DEEP SEA control card with mains grid monitor. The genset will automatically start up when detecting a fault in the electric power network and it will turn off automatically as well, when the electrical supply is re-established. It can also work in manual mode and by signal. It allows you to monitor a wide range of generator parameters and display information alerts, status and alarms.

The module includes communication ports USB, RS232, RS485,and also DSENet® for system expansion. Possibility of Ethernet networking (plug).

The entire module is easily configurable via PC using the DSE specific software configuration.

It has 132x64p illuminated LCD display with 4 lines of text, 5-key navigation through menus, 9 configurable outputs and 8 configurable inputs, programmable clocks and alarms, reading and displaying parameter values, including RMS values.

Different operating modes: AUTOMATIC mode, MANUAL mode, SIGNAL mode and TEST mode.

Other alternative configurations are available upon request to extend the capabilities of the operation modes.

# **Environmental Tests that** the module complies with:

| BS EN 61000-6-2 (electromagnetic compatibility) | BS EN 61000-6-4 (electromagnetic compatibility) | BS EN 60950 (electrical safety) | BS EN 61000-6-2 (Temperature) | BS EN 60068-2-6 (Vibration) | BS EN 60068- 2-30 (Humidity) | BS EN 60068--2-27 (Shock).

# 6. Standard Control panel (Option B)

Main elements of the control panel

- Protection panel, distribution with automatic control module which allows you to work in manual, automatic or signal mode.
  - · Emergency stop button.
  - Protections:
    - 4-pole magnetothermic protection against overloads and short circuits.
    - · Protection fuses for the control set.

6.2.B Protection switch

Model

Schneider Acti 9 50A 4P

6.3.B Control module

Model

ComAp InteliLite 4 AMF 25

The InteliLite 4 AMF 25 is an advanced single generating set controller meticulously designed for both stand-by and prime power applications. This intuitive and flexible controller is engineered for seamless installation and user-friendly operation, providing a comprehensive solution for the control and monitoring of your gen-sets, whether on-site or remotely.

#### **Key Features**

- √ Versatile Application: The controller is adept at handling both stand-by and prime-power
  applications within a single unit, offering unparalleled flexibility.
- ✓ Intuitive Interface: Equipped with backlit symbols, the InteliLite 4 AMF 25 ensures ease of use and quick interpretation of information.
- ✓ Extensive I/O Options: Featuring 8 binary outputs, 8 + 1 binary inputs, and 4 analog inputs (U/I/R), including a +5 V output reference for analog inputs, the controller offers diverse input and output configurations.
- ✓ **Emergency Stop Functionality:** With 2 high-current E-Stop binary outputs, the controller ensures swift and secure emergency shutdowns when required.
- Connectivity: Boasting USB Host and inbuilt RS485, the controller supports easy configuration through InteliConfig and facilitates seamless communication, both locally and remotely.
- ✓ Expansion Capabilities: The presence of 2 slots for extension plug-in modules (Modbus, Internet, SMS, inputs/outputs) and extension CAN modules enhances the controller's adaptability to diverse requirements.
- ✓ Comprehensive Monitoring: The built-in PLC logic, complemented with a PLC monitoring tool in InteliConfig, offers detailed insights into the gen-set operation.
- ✓ Remote Communication: The controller provides full remote communications support, including AirGate 2.0, WSV, Internet access via Ethernet/4G, Modbus TCP/RTU, SNMP v1/v2c, Active SMS, and emails.

# 7. Standard Scope of Supply

#### **Engine**

✓ DEUTZ TD2.2L3 Diesel Engine, 1500 rpm water cooled.

Engine equipped with particulate filter (DPF).

- √ Electronic governor.
- √ Sensors and Alarms:
  - ✓ Oil pressure, temperature, and coolant level alarms.
  - ✓ Oil pressure and coolant temperature readings.
- √ Crankcase ventilation.
- ✓ Protection from hot and moving parts.
- √ Electric motor starting system, battery (maintenance-free) with switch, 12V Charging alternator and starter motor.
- √ High performance fuel particle separator filter. Original from manufacturer.
- √ Oil drain pump (from 60kVA).

#### **Alternator**

- √ 12-Wire, 4-pole brushless STAMFORD S0L2-P alternator with electronic voltage regulation type AVR (AS540).
- √ Auxiliary winding in the alternator.
- √ IP23 protection level.
- √ Insulation class H.

#### **Frame**

- ✓ Electro-welded frame made of high-strength steel.
- $\checkmark$  Painted with electrostatic epoxy-polyester powder paint.
- $\checkmark$  Anti-vibration dampers from the engine block to the frame.
- √ Fuel tank with capacity of 150 litres with retention bath, located on the frame itself. Equipped with cleaning record to facilitate maintenance work.
- $\checkmark$  Measuring gauge and installation of fuel to the engine.
- ✓ Liquid drainage connection to the outside.
- √ Frame tested in a salt spray chamber according to ASTM B-117-09 (500h resistance).

#### Soundproofed canopy

- ✓ Electro-welded canopy of high-strength galvanized steel.
- ✓ Painted with electrostatic epoxy-polyester powder paint.
- ✓ Interior soundproofing by means of a rigid panel made of glass wool with an exterior textile covering.
- √ IP44 mechanical protection level.
- Canopy tested in salt spray chamber according to ASTM B-117-09 (resistance 720h).

#### Standard Control panel (Option A)

- √ DSE 7320 MKII control module.
- ✓ DSE 890 MKII DSEWebNet® / IoT Gateway 4G (GSM/Ethernet). The DSE890 MKII 4G module is used in conjunction with compatible DSE PBXs to provide remote monitoring and communications data via DSEWebNet® or third-party MQTT brokers. The logged data is accessible via DSEWebNet® software and an internet browser or via the app. Users can monitor their equipment, clear alarm conditions, start/stop equipment, or monitor fuel levels.
- ✓ Maintenance-free battery and battery disconnector.
- / Protections:
  - √ 4-pole magnetothermic protection against overloads and short circuits.
  - ✓ Protection fuses for the control set.

# 7. Standard Scope of Supply

### Standard Control panel (Option B)

- √ ComAp InteliLite 4 AMF 25 control module.
- CM-4G-GPS module. An easy-to-use and highly efficient solution for connecting generator sets controllers online via 4G network. Enables remote monitoring and tracking of the gen-set's exact position, helping to optimise its uptime and reduce maintenance costs.
  - ✓ Reliable 4G connectivity with 2G or 3G fallback.
  - √ GPS location for geotracking and geofencing.
  - √ Alarm notification via SMS or email.
  - √ WebSupervisor for remote monitoring.
- √ Maintenance-free battery and battery disconnector.
- ✓ Protections:
  - √ 4-pole magnetothermic protection against overloads and short circuits.
  - √ Protection fuses for the control set.

#### Other equipment

- ✓ Mechanised fuel nozzle outside with key.
- ✓ Tropicalised Radiator for work at 50°C. Prepared for maintenance intervals every 500 hours.
- √ Differential protection.
- √ Emergency stop button.
- √ Reinforced pole centrally-mounted.
- √ Radiator access door.
- √ Reinforced terminal block.
- √ Exhaust thermal sleeves.
- √ Spark arrestor.
- ✓ Document tray.

### **Power sockets configuration**
